

2. THE SANCTITY OF HUMAN LIFE

All life is sacred and is a gift from Almighty God. Sadly, however, many people in our society no longer understand or acknowledge the sanctity of human life.

America has the blood of innocents on its hands. Since 1973, more than 60 million babies have been murdered through abortion and countless lives have been cut short by euthanasia. This is the most tragic holocaust in the history of the world! Some states have even passed laws allowing wounded and suffering infants to lie alone on porcelain trays after somehow surviving unsuccessful abortions. They will die without the comfort of their mothers' breasts.

Not only do we destroy our most vulnerable through abortion and euthanasia, we compel our health care professionals to participate in the taking of human life, and we reject even the most basic legal protections for the unborn, the disabled, and the sick.

If this doesn't touch your heart, you are without compassion. I hope you will not cast a single vote for any politician who supports such wickedness. We desperately need a societal change of heart. But we also need politicians who stand for life and policies that protect life.

Here are links to some related resources. I pray you evaluate this information carefully and prayerfully when you cast your votes in November.
